Sustainability & Energy Efficiency

Building Skills for Sustainable Construction

Are the skills we need for the future different?

What elements of our existing skills need to change?

Sustainability & Energy Efficiency

Building Skills for Sustainable Construction

- Where are the skills gaps?
 - Is it design?
 - Is it specification?
 - Is it execution on site?

It's probably a combination of all of them.

Sustainability & Energy Efficiency

Building Skills for Sustainable Construction

So what can we do about this?

- If we really want to address the lifetime performance and energy efficiency of our buildings – do we need to change our collective behaviours?

Sustainability & Energy Efficiency

Building Skills for Sustainable Construction (Leonardo) Project

- Sustainable Construction

Interest Group

- Business Improvement Seminars
and Employer Engagement Events

Industry Support for Training

- Grants
 - Tier 1
 - Tier 2
 - Tier 3

Industry Support for Training

- Careers & SkillBuild
- Research

Training

- Mobile Training Unit
- Undergraduate Development Programme

Training

- Leader in Construction
- Supervisory Course
- VET360 – Virtual Environment Training in a 360 Degree Environment

Thank You
